Some recent changes have been made to the plan: 1) Mini reserves have been created in the glade & the area opposite using fencing to delineate each area. The areas are already showing strong signs of re wilding. 2) Rest area 3 has been moved out of the thin northern strip to reduce disturbance to local residents. This area will be fenced off to create another mini reserve. 3) Ownership of the small grass area outside the woodland next to the surgery has been confirmed. An entrance path will be developed on this land & the grass area re-wilded.
