

Mockett's Wood Update – July to August 2026

Cleaner. Safer. Kinder

It has been another busy two months of exceptionally dry weather; even the nettles were wilting! Despite this we have seen frogs and mushrooms emerging along with cabbage whites and false widows.

Plenty more planning, costing and purchasing work has been going on behind the scenes in preparation for starting building work on the new rest areas in October.

More fencing work has also been ongoing, including our storage area and the northwest strip. This includes an access gate for maintenance while the area rewilds. In addition, we have been stocking up on wood to decorate fencing and now have a reasonably sized stock at the ready.

A new entrance has also been created on the field border where an old metal kissing gate was located. This will become one of the main accessible wood entrances going forward.
